STAT

FISH SCALES TO BE EXPORTED -- Rzeczpospolita, No 278, 9 Oct 49

The Central Fish Trading Office is preparing to export bleak fish scales, increasingly in demand on foreign markets. The scales must come from the winter catch, and must be dry and fresh; washing must be avoided as it dissolves the pearly crystals. The scales are placed in sacks and pressed to eliminate slime, emptied again, dried, and sprinkled with salt in a ratio of 4 to 100. The processed product is then packed in vacuum-sealed tin cans and placed in cold storage.
